DP

Junior backend engineer with one year of hands-on experience building Python-based microservices using FastAPI, SQLAlchemy, and PostgreSQL. Proven ability to improve API latency, increase test coverage, and streamline deployments through Docker and CI/CD automation. Currently employed at EPAM Systems Armenia, previously completed a bootcamp-style internship at Synopsys Armenia.

EXPERIENCE

Junior Python Developer, EPAM Systems Armenia

Oct 2025 – Present

Yerevan, Armenia

- Built a FastAPI microservice handling ~2,000 requests per minute for a fintech client; added Redis caching for frequent look-ups, lowering average response time from 280 ms to 165 ms (~41% reduction).
- Designed SQLAlchemy ORM models for PostgreSQL that reduced ORM-generated query complexity, cutting DB CPU usage by 22% during peak load.
- Implemented an automated testing suite with pytest and pytest-cov, raising overall service test coverage from 68% to 92% and preventing regressions across three release cycles.
- Set up a CI/CD pipeline using GitHub Actions, Docker, and Helm, reducing release deployment time from 2 days to 4 hours and enabling zero-downtime blue-green releases.
- Contributed to an internal Python library (version-controlled via Git) used by three other teams; the library's adoption cut boilerplate code by ~30% across services.

Backend Intern, Synopsys Armenia

Jul 2025 – Sep 2025

Yerevan, Armenia

- Developed a FastAPI-based internal tool for automating regression test report generation, reducing manual effort by 20 hours per week.
- Optimized SQLAlchemy queries and added PostgreSQL indexes that cut average report generation latency from 4.2 s to 1.1 s (~74% improvement).
- Wrote 60+ pytest unit tests achieving 85% code coverage for the new module, integrated into CI pipeline using GitHub Actions.
- Containerized the service with Docker and Docker-Compose, enabling one-click deployment to the staging environment and decreasing environment setup time from 30 min to 5 min.

SKILLS

Python · FastAPI · SQLAlchemy · PostgreSQL · Redis · Docker · Docker-Compose · pytest · pytest-cov · Git · GitHub Actions · Alembic · Pydantic · Linux · Bash · OpenAPI · REST · CI/CD

EDUCATION

Yerevan State University

BSc in Computer Science · 2022–2025

LANGUAGES

- Armenian – Native
- Russian – C1
- English – B1

CERTIFICATIONS

- PCAP – Certified Associate in Python Programming
- Docker Certified Associate
