luna.magalhaes@sapo.pt · linkedin.com/in/luna-magalhaes

QA Automation Engineer with 4 years of experience designing and maintaining Java-based test automation frameworks for web and API services. Proven ability to reduce regression cycles, improve defect detection rates, and integrate automated checks into CI/CD pipelines. Skilled in collaborating with cross-functional squads to deliver high-quality SaaS and enterprise software releases.

EXPERIENCE

QA Automation Engineer, Talkdesk

Jun 2024 – Present

Lisbon, Portugal

- Designed and maintained a Java-based Selenium test suite covering 150+ web UI flows, reducing regression cycle time from 4 days to 8 hours and catching 23 critical defects per release.
- Migrated 80 legacy TestNG tests to Playwright with TypeScript bindings, increasing test execution speed by 35% and enabling parallel runs on 8 Docker agents in Jenkins.
- Built REST Assured API validation framework for Talkdesk's Call Routing microservice, achieving 99.2% contract compliance and decreasing post-release incidents by 40%.
- Integrated SQL-based data verification steps into CI pipelines, validating 2M+ rows per night and preventing data-drift incidents that previously affected 5% of tenant configurations.
- Collaborated with a squad of 6 developers and 2 product owners to define acceptance criteria, contributing to a 12% uplift in quarterly NPS for the Agent Workspace product.

QA Automation Engineer (Associate), Accenture Portugal

Jun 2022 – May 2024

Lisbon, Portugal

- Delivered automated regression packs for a banking client's core Java web application using Selenium and TestNG, executing 300+ test cases nightly and cutting manual effort by 70% (saving ~1,200 hrs/year).
- Implemented Postman collections and Newman runs in Jenkins to verify 45 REST endpoints, detecting contract violations early and reducing production hotfixes by 25%.
- Developed SQL scripts to verify data integrity across Oracle and PostgreSQL schemas, processing 10M+ rows per week and identifying discrepancies that avoided potential revenue leakage estimated at €180k annually.
- Introduced Dockerized Jenkins agents and parallel test execution, reducing build feedback loop from 45 minutes to 12 minutes for the client's CI pipeline.
- Mentored two junior QA engineers on Java testing best practices, resulting in a 15% increase in team test coverage over six months.

SKILLS

Java · Selenium WebDriver · Playwright · TestNG · REST Assured · Postman · Jenkins · SQL (PostgreSQL/Oracle) · Maven · Docker · Git · JUnit · Allure Report · Cucumber · Jenkins Pipeline · JIRA · TestRail · Linux Bash

EDUCATION

Universidade de Lisboa - Faculdade de Ciências

BSc in Software Engineering · 2016–2020

LANGUAGES

- Portuguese – Native
- Spanish – B2
- English – C1

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL)
- ISTQB Test Automation Engineer
