SUMMARY

Senior Product Manager with over 11 years of experience driving product strategy and execution in consumer music streaming and B2B communications platforms. Proven track record of launching data-informed features that increase user engagement, revenue, and operational efficiency. Adept at aligning cross-functional teams around OKRs, leveraging SQL, Amplitude, and experimentation to deliver measurable outcomes. Based in Stockholm, currently leading product initiatives at Sinch.

EXPERIENCE

Senior Product Manager · Sinch AB, Stockholm, Sweden

07/2021 – Present

- Led cross-functional team of 8 engineers, 2 designers, 4 data analysts to launch Sinch Conversation API, increasing enterprise customer adoption by 35% YoY and generating SEK 120M ARR within first 12 months.
- Implemented a structured product discovery framework using Opportunity Solution Trees, reducing time-to-insight from 4 weeks to 1 week and increasing validated experiment velocity from 2 to 5 per quarter.
- Developed and maintained SQL-based usage analytics dashboard in Amplitude, enabling real-time monitoring of API latency; drove latency reduction from 250ms to 120ms (52% improvement) for top-tier customers.
- Defined OKRs aligned with corporate revenue targets; achieved 118% of key result for net revenue retention (NRR) in FY2025, contributing to SEK 450M uplift in overall SaaS revenue.
- Ran A/B testing program on developer portal documentation, improving developer activation rate by 22% and decreasing support tickets by 18%.

Product Manager (Discovery & Personalization) · Spotify AB, Stockholm, Sweden

07/2015 – 06/2021

- Owned the end-to-end roadmap for the "Discover Weekly" algorithmic playlist, coordinating ML engineers and UX designers; grew weekly active users from 15M to 42M (+180%) and increased premium conversion from playlist listeners by 3.4pp.
- Built SQL-based experimentation framework in Amplitude to measure impact of UI changes; ran 27 A/B tests that collectively lifted average session length by 1.8 minutes (+12%).
- Introduced quarterly OKR process for the Discovery tribe, aligning 5 squads around shared metrics; achieved 95% of key results in 2020, contributing to SEK 800M increase in ad-supported revenue.
- Streamlined backlog grooming in Jira, reducing average story lead time from 10 days to 4 days and increasing team velocity by 28%.
- Partnered with design to create Figma prototypes for a new "Blend" feature; conducted usability testing with 500 users, leading to a launch that achieved 4.2/5 satisfaction score and drove 7% uplift in social sharing.
